

DUAL VIDEO AMPLIFIER AM5L/517

The AM5L/517 is an arrangement of two AM5/516 amplifiers plugged into a special unit mounted on the rear of a PN3/23 panel. The unit provides a common video input and separate mains supplies to the amplifiers. The monitoring output plugs, main video output plugs and terminating resistor (80 ohms $\pm 1\%$ Erie type N6) are also mounted on this unit. The input impedance is 75 ohms only when both the AM5/516 amplifiers are fitted into this unit. The parts list is D24668 R4.
