

NOISE MEASURING SET ME1M/503

This instrument is used for noise measurements in video circuits, in the absence of a signal.

The instrument consists of a Noise Measuring Meter ME1/504 and a Stabilised Power Supplier PS2/13F. These sub-units are mounted on a modified CH1/33 chassis which is normally contained in a

CS2/11A carrying case. The PS2/13F should be replaced by a PS2/48 Mains/Battery Stabilised Power Supplier where a mains supply is not available.

The weight of the unit, including carrying case, is 22 lb. Power consumption is 6 watts with a 240-volt mains supply.
