

ME1/508

FIELD INTERVAL NOISE METER

The ME1/508 measures noise on any one of three pre-selected lines in each field of a 625-line television signal.

The instrument consists of Noise Gating Meter ME1/509 and Stabilised Power Supplier PS2/121K mounted together on a CH1/33 chassis. The portable version ME1/508P is the ME1/508 mounted in a CS2/11A carrying case.

The weight of the ME1/508 is about 5 kg and the total power consumption is about 20 watts from a 240-volt mains supply.
