

SECTION 4

QUARTZ DELAY PANEL PA7M/504

The PA7M/504 is a convenient physical subdivision of a Vertical Aperture Corrector EP1/504 (see Instruction V.15).

The PA7M/504 comprises the following units, mounted from left to right in a double panel PN3/23:

<i>Unit</i>	<i>Instruction</i>
Upper PN3/23	
Distribution Amplifier AM4/512	V.7
Sync Separator UN1/523	V.14
6-dB Pulse Distribution Amplifier AM4/506A	V.7
Power Supplier PS2/13B	G.2
Carrier Amplitude Demodulator DM2/502	V.9
Line Equaliser EQ5/510A	V.5
Bypass Switch UN9/535	V.14
Power Supplier PS2/13G	G.2

<i>Unit</i>	<i>Instruction</i>
Lower PN3/23	
Carrier Amplitude Modulator MD2/503	V.9
Quartz Delay Network NE4M/501	V.9
Quartz Delay Network NE4M/501	V.9
Carrier Amplitude Demodulator DM2/502	V.9
Power Supplier PS2/13K	G.2

The PA7M/504 is tested as part of a Vertical Aperture Corrector EP1/504.
