

POWER SUPPLIER PS2/25

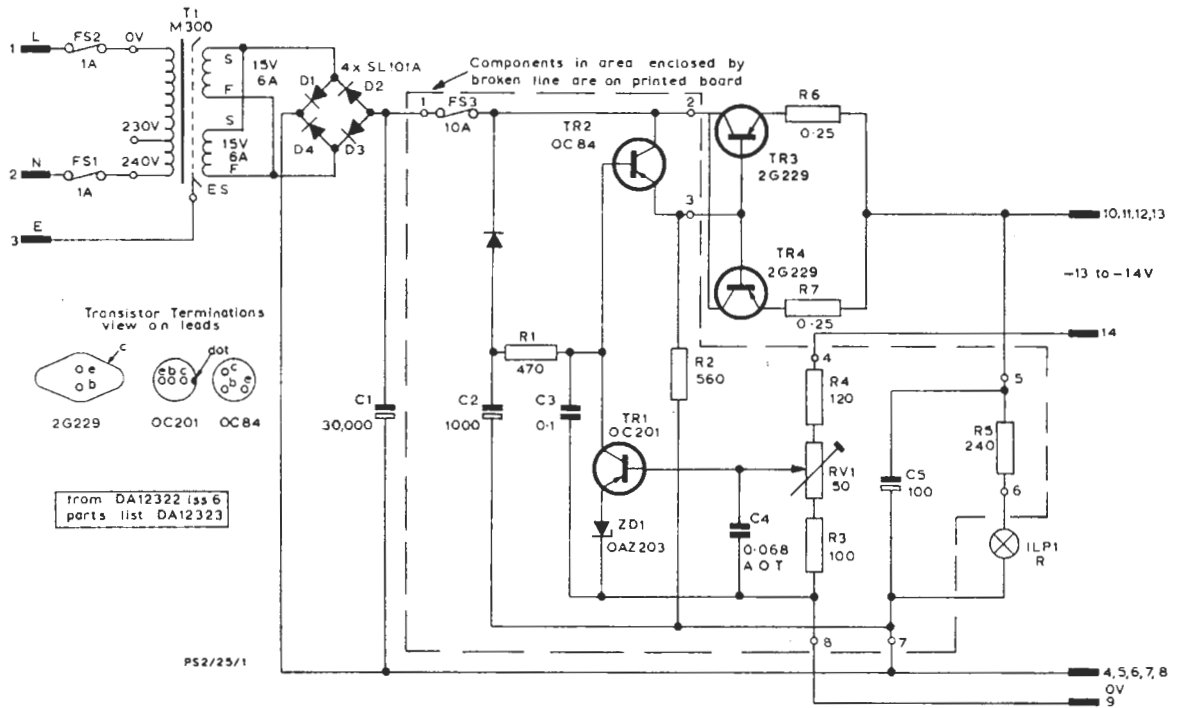

Fig. 1 Circuit of the PS2/25

The PS2/25 is a conventional stabilised power supplier capable of supplying 6 amps at a stabilised output voltage which is adjustable over the range 13 volts to 14 volts. The output resistance of the PS2/25 is 0.025 ohms and the ripple voltage on the output is less than 15 mV at 6 amps.

Separate reference amplifier connections are provided to compensate for resistance in external output leads.

The PS2/25 is constructed on a CH1/12D chassis with index-peg positions 21 and 24.
