

POWER SUPPLIER PS3/34

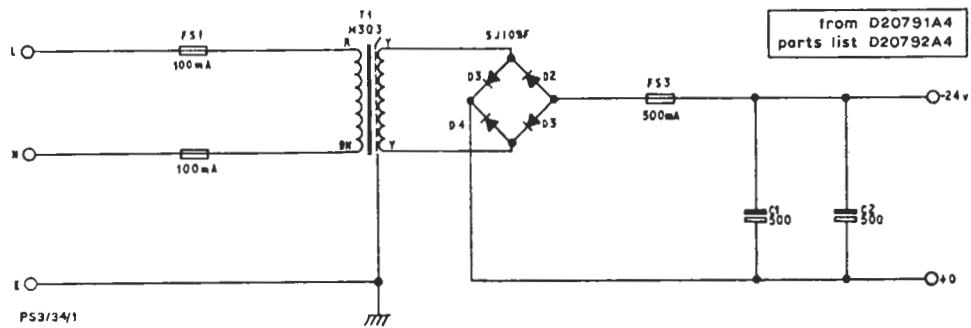

Fig. 1. Circuit of the PS3/34

The PS3/34 is a nominal 24-volt supplier which accepts a 240-volt 50-Hz mains input and provides an open-circuit output of 35 volts which drops to 28 volts on full load (170 mA). The output in-

cludes a hum component of approximately 1 volt p-p. The PS3/34 is constructed on a printed wiring board approximately 7 in. by 2 in.
