

SHORTING UNIT UN1/570

The UN1/570 consists of a CH1/12A chassis with terminals 11 and 15 joined. Index-peg numbers are 2 and 32.

When the unit is used as part of the Test Line

Signal Generator GE4M/518A, it replaces the Automatic Monitor MN2/509, joining together the terminals between which the monitor is normally connected.
